Ultrasound Guided Peripheral IV Access
4-Hour Intensive Course (RN, NP, PA)

Course Description
This course is designed by a multidisciplinary team with a primary audience of RNs, NPs, and PAs who want to gain the skills of utilizing an ultrasound machine to successfully obtain difficult intravenous access on patients who otherwise are considered a “hard stick.”

Learn how an ultrasound machine can assist with peripheral intravenous access on patient populations with difficult access. Get hands on experience with actual ultrasound machines and benefit from a 1:4 Instructor to Attendee ratio. Instructors are a mixture of Emergency Department RNs and MDs with a focus in point-of-care ultrasound. Learn and gain confidence in this useful skill and apply it to your practice!

Program
7:30-8:00am   Registration, Coffee and Light Breakfast
8:00-9:45am   Intro, Policies, Logistics, IV Access, Ultrasound Use
9:45-10:00am  Break
10:00-12noon  Hands On Practice

Date and Time  Saturday, October 13, 2018. Registration 7:30am, Course 8:00am-12noon
Location  Icahn School of Medicine at The Mount Sinai Hospital New York, NY
Cost $325, Mount Sinai Employee $275, ENA Member $275

Yun Cee Dirsa is a Registered Nurse who specializes in Resuscitation and Critical Care Emergency Nursing and is the host of the popular Resus Nurse Podcast and Blog. Her interests include maximizing nursing care to critically ill patients, nursing education, and wellness. She currently works as a Clinical Nurse at The Mount Sinai Hospital’s Emergency Department.

Bret Nelson is a Professor of Emergency Medicine, Chief of the Emergency Medicine Ultrasound Division at the Icahn School of Medicine at Mount Sinai, Chief Editor of the ultrasound education website, www.SinaiEM.us. He is on the board of directors of the Society for Clinical Ultrasound Fellowships and active in the American College of Emergency Physicians (ACEP)’s Ultrasound Section and is among the authors of ACEP’s Emergency Ultrasound Guidelines.

Authored several books, Manual of Emergency and Critical Care Ultrasound, Emergency Medicine Oral Board Review Illustrated, Atlas of Handheld Ultrasound, and Acute Care Casebook. Dr. Nelson has lectured throughout the world on the use of point-of-care ultrasound to aid medical decision-making and improve patient safety. His research interests include ultrasound and medical education.
